Model FD-MB-3V
Manual Quadrant, Static Fire Damper
3V Blade
1-1/2 or 3 Hour, UL555 Classified

Application:

The BAS/CVS model FD-MB-3V is a multi-blade fire damper with 3V blades. The FD-MB-3V is used to prevent the spread of fire through a penetration in a fire rated barrier made by an HVAC duct or transfer. The FD-MB-3V can be installed vertically (with blades running horizontally) or horizontally. The FD-MB-3V can be installed in static systems (fans shut off in a fire) only. This model is most commonly used when required sizes exceed BAS/CVS's UL listing for the BAS/CVS Model FD (curtain style fire damper). Refer to the Maximum and Minimum Size table on this page.

Consult CVS for Other Special Requirements.

- To determine pressure drop:**
1. Locate the applicable face velocity on the bottom of the chart.
 2. Move up the chart to the most appropriate size damper line.
 3. From the intersection point, move left to determine the pressure drop.

Pressure drop testing was performed by an independent laboratory to the AMCA Standard 500-D, Fig. 5.3 (ductwork upstream and downstream).

Sleeve Requirements:

Standard suggested sleeve depth is 16" (406), which is appropriate for use with up to a 6" deep (152) wall/floor and 2-sided mounting angle installation. (See Detail to the right).

When wall/floor thickness exceeds 6" (152), **add 1" (25) for each additional inch of wall/floor thickness** to ensure sleeve fully penetrates the wall/floor. Each additional 1" (25) added will be added to the non-quadrant side.

The damper may be installed/rotated 180° as long as the blades run horizontally.

The top of the damper is either side of the frame as long as the blades are running horizontally.

Damper is not approved for installation with the blades running vertically.

The entire damper frame does not have to be installed in the plane of the wall/floor.

The requirement is that the blade closure line (the center line of the 5"(127) damper frame) must be within the plane of the fire-rated wall/floor.

Typical Sleeve Lengths

Wall Thickness	Min. Sleeve Length
6 (152)	16 (406)
8 (203)	18 (457)
12 (305)	22 (559)
16 (406)	24 (610)
