### Model FSD-AF-FA-211

Combination Fire/Smoke Damper  
Front Access & Out-of-Wall/Floor Application  
Airfoil Blade, 1-1/2 Hour, Class 1, UL-Classified  
(Class I is < 8 cfm per sq. ft. @ 4" w.g.)

### Application:

The BAS/CVS model FSD-AF-FA-211 is a combination fire/smoke damper with Airfoil style blades, for decreased pressure drop, intended for installation outside the plane of a wall or floor with front (or grille) access to the actuator. The FSD-AF-FA-211 is used to prevent the spread of fire and smoke through a penetration in a fire and smoke rated barrier made by an HVAC duct or transfer. The FSD-AF-FA-211 can be installed vertically (with blades running horizontally) or horizontally. The FSD-AF-FA-211 can be installed in static or dynamic systems up to the allowable tested pressures and velocities below.

**MAXIMUM VELOCITY\***: 2000 fpm (10.2 m/s).

**MAXIMUM PRESSURE\***: 4" wg (1kPa).

### Standard Construction:

	Standard	Optional
<b>Frame Material</b>	20 Gauge (1) Galv. Roll-Formed Steel hat section w/ staked corners for integral bracing	-----
<b>Blade Material and Type</b>	Airfoil-shaped, double skin galvanized steel mechanically fastened to form equivalent to 14 Gauge (2) Steel	16 Gauge (1.5) "3V" Galv. Roll-Formed Steel (see Model FSD-3V-FA-211)
<b>Blade Sizes</b>	Min. width of 5" (127) to max. width of 7" (178)	-----
<b>Frame Depth</b>	5" (127)	-----
<b>Dimensions</b>	Actual - 1/4" (6)	Actual
<b>Axle Bearings</b>	Bronze Oilite (press fit into frame)	-----
<b>Axle Material</b>	Plated Steel	-----
<b>Seals</b>	Pressure Sensitive 450°F (232°C) silicone blade edge & flexible stainless jamb seals	-----
<b>Linkage</b>	.125" (3.2) plated steel, Concealed in Frame	-----
<b>Sleeve</b>	16" x 20" gauge (406x1 galv. steel w/ 1" (25) flange (1 side)	Wide variety of gauges and lengths available
<b>Thermal Blanket</b>	0.25" (6) thick thermal blanket 3 sides for vertical and 4 sides for horizontal applications	-----
<b>Front Access Panel</b>	Max. 6 inch. (152.4 mm), installed inside damper sleeve to conceal actuator & TRD.	-----
<b>Heat Responsive Device</b>	Electric thermostat (165°F - 74°C)	212°F (100°C) 250°F (121°C) 350°F (177°C)
<b>Operating Temp.</b>	350° (177°C)	-----
<b>Leakage Class Rating</b>	Class 1	Class 2 (see Model FSD-AF-FA-212)
<b>UL Hour Rating</b>	1-1/2 Hour	-----

### Minimum & Maximum Sizes:

Front Access Damper Model	Minimum Size	Maximum Size
	1.5 Hour	1.5 Hour
FSD-AF-FA-211 Vertical	12 x 12 (305 x 305) <sup>1</sup>	36 x 48 (914 x 1219)

<sup>1</sup>Contact Factory for smaller sizes.

All dimensions shown in inches, parentheses ( ) indicate millimeters.

1 As part of our continuous improvement program, we reserve the right to make further improvements without notice.

### LISTINGS:

UL Listing: R27700(UAE), R41135(KSA), R40068(Qatar), R41122(Egypt)

### STANDARDS MET:

NFPA Standards: 80, 90A, 92A, 92B and 101

Building Code Standard:

ICC International Building Code

\*Width [A dimension] and \*Height [B Dimension] are approximately 1/4" undercut. Sleeved dampers are furnished approximately same size as given duct dimension plus 0.25" (6) for insulation.

### Optional Construction:

#### Auxiliary Switch

Add to Actuator Blade Mounted Switch (BIS)

#### Momentary Test Switch

#### Dual Thermostat Box (DTB) w/ Dual Position Indicator Switches

Temp: 165°/250° 165°/350° 212°/350°

#### Factory Sleeve:

Optional Length: \_\_\_\_\_ (Std. 16" [406])

Gauge: 20 (1.0) 18 (1.2) 16 (1.5) 14 (2.0) 10 (3.5)

#### Framed Retaining Angles 16ga. x 1-1/2" x 1-1/2" (1.5 x 38 x 38)

#### Remote Control Box

RCB-1 RCB-2 RCB-3

#### Smoke Detector (Shipped Loose)

#### Actuators (Refer to UL Damper Actuator Reference Chart)

Type: Electric: Model # \_\_\_\_\_ Pneumatic: Model # \_\_\_\_\_

Location: Internal (Std)

All dimensions shown in inches, parentheses ( ) indicate millimeters.

Submittal

**Pressure Drop**

- To determine pressure drop:**
1. Locate the applicable face velocity on the bottom of the chart.
  2. Move up the chart to the most appropriate size damper line.
  3. From the intersection point, move left to determine the pressure drop.

**AMCA Figure 5.3 - Ducted Inlet and Outlet**

Pressure drop testing was performed by an independent laboratory to the AMCA Standard 500-D, Fig. 5.3 (ductwork upstream and downstream).

**Note:**

Pressure Drop for both sizes reflect damper face area only, and does not take into account the 6" deep actuator compartment.

### Actuator Requirements:

**UL555S requires that all leakage rated dampers be provided with factory mounted actuators.** Available actuators vary by damper size and velocity, pressure and temperature ratings. Consult Motor/Actuator sheet for UL Products for current offering.

All electric actuators will be factory wired to a single heat-responsive device. *The default heat-responsive device is a resettable thermostat that interrupts power to the actuator allowing for controlled closure.*

### Sleeve Requirements:

**Sleeve must be installed at the factory for out of wall/floor products.** As with all fire rated damper installations, the sleeve must fully penetrate the wall/floor being protected.

Sleeve length is dependent upon damper height, grille depth (including OBD) and actuator selection:

- Standard clearance allowance for grille inset is 3" (76).
- Maximum sleeve length is 16" (406) plus the total wall depth.

**Sleeve is provided with a 3/4" (19) flange on the actuator end of the sleeve by default.** Flange must be on top of barrier in horizontal installations.

### Thermal Blanket:

A factory installed thermal blanket is provided on three sides (bottom excluded) for dampers ordered for vertical installation and on all four sides for dampers ordered for horizontal installation.

Due to the nature of the application for Out-of-Wall and Out-of-Floor Combination Fire/Smoke dampers, a 0.25" (6) thermal blanket is installed around the sleeve at the factory.

**This insulation is required as part of the UL Listing of the out of wall/out of floor assembly and must not be removed.**

\*Thermal Blanket provided 3 sides for Vertical and 4 sides for Horizontal. \*\*3" clearance supplied for grille standard.
